

As a resident of Raleigh, North Carolina, I feel abundantly blessed to have found an FM Translator for K*Love on my radio dial. I am concerned that your proposed changes to this would cause me to lose such a valuable part of my daily life. Since learning of K*Love, I have been able to refer many friends to such an amazing station. Additionally, K*Love is 100% listener funded, and if we lose the ability to hear this station, they will lose funding to play their station. Thousands of lives are changed because of K*Love, and millions are blessed daily through their encouraging words and music. Though I believe K*Love originates in California, the current FM Translator allows me to hear them. Changing the current translation to LPFM would interfere with many of K*Love's signals and leave thousands of listeners without their radio lifeline. Please keep the current Translator system in place so regional and national broadcasting worth listening to is not lost. Many Thanks. Lynda
